

E.E.I. Ltd

European Energy Investments

Energy Project Development and Investment Services

E.E.I. specialises in selecting power project developments that offer business advantage to both the customer and the investor. EEI identifies attractive opportunities, carries out comprehensive feasibility studies to ensure each project is both technically and economically viable, and manages the entire project development process, including project financing, to achieve a successful start to commercial operations.

Many types of power generation and CHP projects can be supported including;

- Cogeneration and CHP plants for Municipal and industrial customers,
- Gas turbine based power generation facilities
- Diesel and HFO engine power plants, with heat recovery if required,
- Renewable energy projects including wind, hydro, and biomass power plants,
- Emission reduction and carbon saving projects including the sale or trading of carbon assets arising from such projects.

The services available from EEI include:

Market selection and assessment: Review of potential markets or industry sectors to identify suitable markets for energy investments.

Project assessment and selection studies: To identify attractive projects, and to select and compare projects to ensure that the best opportunities are adopted from the range available.

Feasibility Studies: To examine the technical and commercial feasibility of projects before making an investment decision.

Project Evaluation: Financial modelling to determine whether an investment opportunity will provide the required returns taking into account all relevant assumptions and risks for the project.

Technical Solutions: Identifying the range of viable technical options for a project and finding the most suitable solution required to meet all investment parameters.

Risk Assessment and Management: Clarifying project risks, identifying actions to mitigate risks, and managing such risks to turn them into actions or opportunities.

Contract Negotiation: Negotiation of fuel supply and energy sales contracts, development agreements, construction and service contracts, and other contracts required to complete project development.

Introduction of Investors: Selection and introduction of investors for energy customers, either as a single investor, or as a group of investors co-ordinated by EEI.

Project Financing: Identifying lenders to provide the balance of project finance in addition to that contributed by the investor, negotiation of lending agreements, completing all necessary documentation to close project financing.

Construction Management: Negotiation of equipment supply and construction contracts and management of the supply and construction process through to plant commissioning.

Commercial Operation: Plant commissioning, recruitment of operations staff, or hand-over to an operations team, and start up of commercial operation.

Project Development: All of these services can be combined into a complete project development service on behalf of development companies or investors. Managing the project development process from initial project identification through contracts negotiation and execution to achieve successful start up of commercial operation.

These services are provided by EEI Ltd working with partners and associates when appropriate to provide specialist skills and local market knowledge.

EEI Ltd has direct experience of project developments in;

Central Europe - including Bulgaria, Romania, Macedonia, Poland, and Ukraine
Western Europe – UK,
Southern Europe – including Italy, Turkey, and Spain,
Caribbean – including the Dominican Republic.

EEI Ltd is now working on project developments in Bulgaria, Romania, and Macedonia, and is available to work on other similar projects. Please contact Ian Stanley on the numbers below to discuss your requirements:
